### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Cort Flint on February 06, 2004.

3. The application has been amended as follows:

*In the specification:*

The priority statement has been replaced with:

--This is a CON of a copending Application Serial No. 09/418,619, filed 10/15/1999, which is a CIP of Application Serial No. 09/301,394, filed 04/28/1999, now U.S. Pat. No. 6,571,532, which is a CIP of Application Serial No. 09/137,327, filed 08/20 1998, now abandoned, which is a CON of Application Serial No. 08/736,376, filed 10/24/1996, now U.S. Pat. No. 5,797,249, which is a CIP of Application Serial No. 08/338,026, filed 11/10/1994, now U.S. Pat. No. 5,588,282, and the above applications and patent disclosures are incorporated herein by reference.--

*In Claim 119:*

“a motion converter operatively connected between said pickup heads and grid heads and said rotating turret” (lines 23-24) has been changed to: --a motion converter including supports carried by said turret for supporting said pickup and grid heads

Art Unit: 3721

and connector mechanisms operatively connected between said pickup heads and grid heads and said rotating turret, said motion converter--.

*In Claim 122:*

“motion converter” has been changed to: --supports--.

*In Claim 132:*

“turret” (line 13) has been changed to: --axis--;

“a pickup-head motion converter associated with said turret and operatively connected to said pickup heads” (lines 17-18) has been changed to: --a pickup-head motion converter including supports carried by said turret for supporting said pickup heads and articulating connector mechanisms associated with said turret and operatively connected to said pickup heads--.

*In Claim 134:*

“said pickup-head motion converter includes articulating connector mechanisms swiveling” (lines 1-2) has been changed to: --said articulating connector mechanisms swivel--.

*In Claim 135:*

“motion converter” has been changed to: --supports--.

*In Claim 140:*

“by actuating said linkage mechanism through the pickup station” (line 4) has been changed to: --through the pickup station by actuating said linkage mechanism--.

Art Unit: 3721

4. *Reason for the Examiner's Amendment:* the examiner proposed, and agreed to by applicant's attorney, to amend Claims 119 and 132 to include additional structure so that the functional language can be given full patentable weight, i.e. the supports carried by the turret support the swiveling motion of the pickup heads about the secondary swivel axis and the connector mechanisms transmit the swiveling motion of the pickup heads through the pickup station.

5. *The following is an examiner's statement of reasons for allowance:* the prior art of record fails to disclose and/or teach a continuous circular motion apparatus for packing articles into cases including in combination a motion converter that causes the pickup heads to swivel about a swivel axis and depart from the main radial path to move along a straight-line path through the pickup station and then return and maintain the pickup heads along the main radial path without swiveling after passing through the pickup station.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

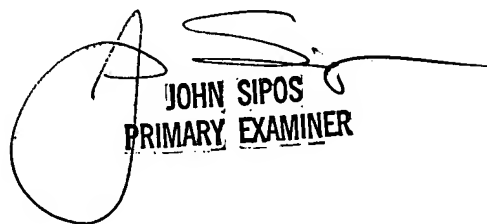

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Louis K. Huynh whose telephone number is (703) 306-5694. The examiner can normally be reached on M-F from 9:30AM to 5:00PM.

Art Unit: 3721
